What else do you need
Cubed or packet jelly for the slush and cubed jelly for the gummies, and a little juice to add to the slushy.
A clean work surface
A clean damp cloth
An apron to protect your clothes
A freezer or fridge (will help set the jelly quicker)

Let's get started (For use under adult supervision)
To ensure success read through the instructions and keep for reference. Store this kit out of the reach of children under 5 years of age. Wash hands before and after each activity. The area around the activity should be kept clean.
Protect the floor beneath the workspace in case the jelly spills.

STAGE 1: Prepare some jelly – First make some jelly by following the instructions on the packet, making it slightly more diluted than the suggested mix will help. Ideally make 3 different colours (Jelly is not included in the box).

Assembly
Follow these pictures to assemble and un-assemble

[Instructions and diagrams for assembly]
**STAGE 2: How to make Gummies**

**a.** Take one cube of jelly and wet it under a tap or in a glass of water, insert in the cube cutter (Pic 1) and push down (you might need adult help), remove the quartered pieces and push one piece into each gummy shape on the tray (Pic 2).

**b. GET AN ADULT TO DO THIS PART.** Place the tray in a microwave, heat at quarter power (around 180W) for 10-15 seconds DO NOT heat for longer, look at the tray and if not melted heat for 3-5 seconds more. Remove the tray and allow to cool/set (using a fridge or freezer will speed this up, allow 10-20mins).

**c.** Now use the gummy tool and push the curved end under the edge of a gummy to help get it out of the tray (Pic 3).

**TOP TIPS:** Allow time for the gummies to set, the least time in the microwave the better as they will set quicker. Adding a tiny drop of water to each shape before making, makes it easier to get out after setting.

*Use fresh jelly from an un-opened packet.*

**STAGE 3: How to make jelly slush**

Remove the jelly from the fridge or freezer.

**a.** Take the carousel, this should have the two yellow disks at the bottom, the knob should be to the left so that it blocks the holes and prevents the jelly dropping out. Spoon some jelly of each colour into the 3 areas in the carousel, fill half to two thirds full (Pic 1).

**b.** Insert the carousel into the jelly fun, pushing down the button at the back to lock in the carousel, rotate the carousel to the chosen colour and it should click into place, now insert the plunger.

**c.** Place a glass under the dispenser and SLOWLY turn the handle anti clockwise, if the handle jumps it maybe the jelly is too cold, or the dilution was not weak enough, you are turning the handle too fast or there is too much jelly in the carousel, try turning slower or removing some jelly. (Don’t worry if the handle makes a clicking sound and the plunger does not move, it is a safety mechanism to stop it breaking the plastic, just keep trying).

Add some of first colour, then rotate the handle back so that the plunger lifts out and rotate the carousel to the next colour and repeat, adding layers of colour and flavour.

*You can add gummies between layers or put on the top, add a little juice (orange juice, squash etc, the choice is yours) about a tablespoon full.*

*Add a straw and enjoy!*

**Cleaning up**

Jelly Fun can be washed in a dishwasher on the low temperature setting, or wash by hand with normal washing up liquid. Washing soon after use, before the jelly really sticks will help.

Unless you have problems drying the parts, we suggest you only remove the red top (with the handle) and the carousel unit (with the two yellow disks below) from the base, rather completely taking apart, if jelly is stuck between the parts then take apart to clean thoroughly.

**WARNING!** Not suitable for children under 5 years of age. For use under adult supervision. Follow instructions and keep them for reference. Keep away from small children and animals. Use protective clothing. Always clean parts which come into contact with jelly thoroughly and work surfaces to maintain a hygienic work area.

John Adams are constantly endeavouring to improve quality standards and therefore colours, sizes and contents may sometimes vary from those shown. Made in China.
