**Object**

Be the player with the least number of carrots that did not make the sheep’s fleece fly off!

**Set Up**

Insert 2 x AA batteries (see pic 1),

Push the sheep onto the base (see pic 2),

SWITCH ON! (see pic 3).

Insert the fleece onto the sheep’s back (see pic 4),

Distribute the carrots to all players one at a time starting with the youngest player until all are distributed.

**Play**

The sheep will **baa** repeatedly, this indicates it’s the first players turn to start feeding the sheep, the player places one of their carrots under the sheep’s mouth (see pic 5 & 6) and then pushes the head firmly all the way down then allows the head to come back up gently, the sheep will eat the carrot and make funny eating sounds.

The sheep will then either **baa** or make **hiccup** sounds, if it **baa**’s then pass the sheep to the next player to start feeding, if it hiccups the same player has to feed the sheep again and continues until the sheep **baa**’s.

Continue passing the sheep when it **baa**’s, if you run out of carrots you must use carrots from another player’s pile of food and feed the sheep.
Winning
The player that made the fleece fly off loses!
The winner is either the player with the least carrots or the player that used their carrots first.

Play again
Tip the sheep back (see pic 7) and retrieve all the carrots, replace the sheep as in Pic 2.
Insert the fleece onto the back, you are ready to play again.

Reset game
Move switch to OFF (see pic 3) this will eject the fleece, move switch to ON then insert fleece.
NB FLEECE WILL NOT INSERT IN THE OFF POSITION.

BATTERY INFORMATION: The Greedy Sheep requires 2 x AA batteries (not supplied). We recommend alkaline batteries for optimum performance. An adult should install the batteries and take note of the following – open the cover on the base of the unit by using a cross head screwdriver. Insert the batteries making sure the + and – signs on the batteries are aligned with the corresponding + and - markings inside the compartment.
- Do not recharge non-rechargeable batteries.
- Do not mix different types of batteries such as alkaline and rechargeable, or used and new batteries.
- Rechargeable batteries are to be removed from the toy before charging them.
- Rechargeable batteries are only to be charged under adult supervision.
- Only batteries of the same or equivalent type as recommended are to be used.
- Insert batteries in the correct polarity.
- Remove exhausted (used) batteries from the toy.
- Remove batteries from the toy if it is not going to be used for a long period of time.
- Do not short-circuit the supply terminals.
- Batteries should be replaced by an adult.
- Do not attempt to power battery products from the mains supply and do not insert connecting wires into electrical socket outlets.
- Dispose of used batteries at a recycling point. Never dispose of batteries in fire.
