Create your very own 2 in 1 Night Light & Projector!
Please read through these instructions fully before starting to make your Projector.

What’s in the box?

2 in 1
Night Light & Projector

3
Sparkly Scenes

6 Jelly paints

What else do you need?

3 x AA batteries and a small screwdriver.
An apron or old clothing for you to wear.
A protective covering such as newspaper for your workspace and floor area underneath to protect furnishings from any paint spills.
Colour with jelly paints

Position your sparkly scenes so the silver side is facing you and the purple side is face down. Then use your 6 glittery jelly paints to decorate. When done place to one side and allow to dry completely for at least 24 hours.

Top Tips!

To prevent air bubbles in the paint hold the tube with the nozzle pointing downwards when in use.

Always replace your tube caps after use to prevent paint from drying out.

To open the paint, turn the cap anti-clockwise.

To unblock pens insert paper clip into nozzle.

Assemble your projector

You may need to ask an adult to help with this.

Slot the glitter tube into the centre hole of your projector base.

Next place the disk on top of the tube.

Now position the cylinder on top of your projector base.
Choose & display

Once your sparkly scene is completely dry fold both ends together, making sure the purple side is facing outwards and drop inside the cylinder.

Then place your jewelled dome lid on top of the cylinder.

Light & sparkle!

Ask an adult to insert 3 x AA batteries into the base unit (see back page for BATTERY INFORMATION).

Switch on to see your bedroom sparkle!

Choose Night Light mode (position 1) for a cosy nighttime glow.
Choose Projector mode (position 2) which slowly rotates to create a magical jewel lightshow across your walls and ceiling.
To turn off switch to position 0.

To change scenes simply remove your jewelled dome lid, carefully remove the scene, then replace with a new design and place your jewelled dome lid back on top.
BATTERY INFORMATION
Disney Princess Night Light & Projector requires 3 x AA batteries (not supplied). We recommend alkaline batteries for optimum performance.
An adult should install the batteries and take note of the following – open the cover on the base of the unit by using a cross head screwdriver. Insert the batteries making sure the + and – signs on the batteries are aligned with the corresponding + and - markings inside the compartment.
Do not recharge non-rechargeable batteries.
Do not mix different types of batteries, or used and new batteries.
Rechargeable batteries are to be removed from the toy before charging them.
Rechargeable batteries are only to be charged under adult supervision.
Only batteries of the same or equivalent type, as recommended, are to be used.
Insert batteries in the correct polarity.
Remove exhausted (used) batteries from the toy.
Remove batteries from the toy if it is not going to be used for a long period of time.
Do not short-circuit the supply terminals.
Batteries should be replaced by an adult.
Do not attempt to power battery products from the mains supply and do not insert connecting wires into electrical socket outlets.
Dispose of used batteries at a recycling point. Never dispose of batteries in fire.

Disposal of old electrical and electronic equipment.
This symbol on the product or its packaging indicates that this product should not be treated as household waste. Instead it should be handed over to the appliance collection point of a recycling centre for electronic and electrical equipment.

For more detailed information about recycling of this product, contact your local Civic Office, your household waste disposal service or the place you purchased this item from.

WARNING. Not suitable for children under 36 months. Choking hazard – contains small parts. Adult supervision required. Paints may stain surfaces, please protect clothing and the working area.
