Contents

- Soggy Doggy body and skin
- Base unit with bath, taps and tap reservoir
- Shower attachment
- Game board (made up of 2 sections)
- 4 x Game board stickers
- 4 x Playing pieces
- 4 x Tokens
- Dice. Requires 3 x AA batteries (not included)

Set Up

A small amount of assembly is required before playing Soggy Doggy for the first time:

- Click together both halves of the game board. Then carefully apply all four stickers matching A, B, C, D on each sticker to the game board. (For top tips on how to apply stickers visit www.idealboardgames.co.uk)
- Insert 3 x AA batteries (not supplied) into the base unit as shown in the diagram overleaf and turn ON.
- Push the Soggy Doggy body down onto the holder inside the bath, then carefully place the Soggy Doggy skin over the body.

How to Play

The youngest player rolls the dice and follows the actions:

- Roll a Pink, Blue, Yellow or Red and move your playing piece to the first unoccupied space of the matching colour on the game board. Then follow the action shown:
- Roll a = Roll dice again.
- Roll a = Move your playing piece to the space in front of the player furthest around the game board.

Watch out! Sometimes when you turn the tap Soggy Doggy will start shaking to get the water off. Turn the tap one half turn to stop him shaking, move your playing piece back to the basket space on the game board and pick up a token with the matching symbol to your playing piece. If Soggy Doggy starts shaking but you already have a token you can give this back to stay on the same game board space. Play then continues.

Play again? Return tokens and lay all the playing pieces onto the basket space of the game board. Check there is enough water in the reservoir and start again.

Aim of the Game

Race around the board, washing Soggy Doggy but watch out he loves to shake himself dry! Make him shake and it’s back to the start. Be the first player to make it all the way round and back to the doggy basket to win!
**CARING FOR YOUR SOGGY DOGGY**

All dogs must be cared for and Soggy Doggy is no different.

Only fill Soggy Doggy’s tap reservoir with cold tap water as other liquids may be harmful to people and could damage the game.

After playing always tip any water out of the bath and tap reservoir, push the tap down a few times to clear any remaining water, pat the dog dry with an absorbent cloth or kitchen towel, then **leave out of the box until completely dry. DO NOT MECHANICALLY WASH OR DRY ON OR NEAR DIRECT SOURCES OF HEAT.**

Remove any objects from the playing area which could be damaged by Soggy Doggy’s shaking.

A full tap reservoir should last for a few games but if not simply refill the reservoir between games.

Do not let the base unit stand in water and take care not to get the ON/OFF switch and battery box wet when filling or playing.

If Soggy Doggy is not showering correctly, ensure there is water in the tap reservoir and that the shower head is not blocked.

Performance may be affected by the battery life. Always use fresh batteries.

To avoid damaging the electronics, do not pour water over the product. Only pour water into the tap reservoir.

---

**BATTERY INFORMATION**

Soggy Doggy requires 3 x AA batteries (not included).

We recommend alkaline batteries for optimum performance.

- An adult should install the batteries and take note of the following – open the cover on the back of Soggy Doggy by using a cross head screw driver. Insert the batteries making sure the + and – signs on the batteries are aligned with the corresponding + and – markings inside the compartment.
- Do not recharge non-rechargeable batteries.
- Do not mix different types of batteries, or used and new batteries.
- Rechargeable batteries are to be removed from the toy before charging them.
- Rechargeable batteries are only to be charged under adult supervision.
- Only batteries of the same or equivalent type, as recommended, are to be used.
- Insert batteries in the correct polarity.
- Remove exhausted (used) batteries from the toy.
- Remove batteries from the toy if it is not going to be used for a long period of time.
- Do not short-circuit the supply terminals.
- Batteries should be replaced by an adult.
- Do not attempt to power battery products from the mains supply and do not insert connection wires into electrical socket outlets.
- Dispose of used batteries at a recycling point. Never dispose of batteries in fire.
- Disposal of old electrical equipment.

This symbol on the product or its packaging indicates that this product should not be treated as household waste. Instead it should be handed over to local Civic Office, your household waste disposal service or the place you purchased this item from.
