Quick Play Rules:

1. Separate the Challenge Cards into 2 piles: level A and level B.
2. Each Challenge becomes a problem to solve.
3. The problems come in 7 rows of physical and electronic challenges for increasing difficulty.
4. In each level, the first 3 challenges can be crossed off the list and eliminated from the game.
5. The play is over when all 3 challenges have been crossed off in a row.
6. The player with the most points after all 3 challenges have been crossed off wins.
7. The player is awarded points for an unsuccessful challenge according to the challenge importance mean.
8. A player cannot go back to the previous level.
9. The player starts at the top left corner and 3 cards are dealt.
10. The player must cross off all 3 cards before moving to the next level.
11. The player must make a decision at the top of the phase.
12. The player is awarded points for crossing off a card.
13. If a player has gone over the amount of points, the game is over.
14. If a player gets an amount of points, the game is over.
15. If a player gets an amount of points, the game is over.
16. If a player gets an amount of points, the game is over.
17. If a player gets an amount of points, the game is over.
