## HOW TO DECORATE THE STICKERS

## USING AND CLEANING

Before starting, gently remove the detachable parts of the stencil (if necessary). Blow at a distance of at least 8 to 10 cm from the paper. Never put the tip or the ink cartridge in the mouth. Take breaks between each use. Rinse the tips and caps between each use and let dry for a few minutes. Non-rechargeable. Blopens may stain. We suggest wearing an apron and protecting your furniture and carpets. Stains on skin and fabric can be cleaned with soap. Avoid prewash products that may stain. For tougher stains fabric may have to soak overnight in soap and water. An additional washing may be necessary for the persistent stains. In order to avoid any discoloration, follow the instructions provided by the soap or detergent product manufacturer. Avoid chlorine, chemical cleaners and biological washing powders.

**Warning!** The markers are indelible on fabric and porous surfaces. We recommend wearing an apron during your art and craft activities and protecting your furniture and carpets. Wash hands thoroughly after use.
